THE NOVA RESEARCH CURRICULUM

Mathematics

Grade 2 · Term 2

Student edition

Outcomes: MA-2.3 tables of 3 and 4 and division within the tables, MA-2.4 halves, thirds and quarters.

Lesson notes

MA-2.3 Tables of 3 and 4 (Weeks 1–4)

Build from arrays and skip counting (3, 6, 9 …; 4, 8, 12 …). The 4 table is double the 2 table. Daily 5-minute recall.

MA-2.3 Division within the tables (Weeks 5–8)

Sharing equally: 12 sweets shared among 3 children = 4 each → 12 ÷ 3 = 4. Grouping: how many groups of 4 in 20? Link to multiplication: 3 × 4 = 12 so 12 ÷ 3 = 4.

MA-2.4 Fractions (Weeks 9–12)

Fold paper and cut rotis: half (2 equal parts), third (3 equal parts), quarter (4 equal parts). Parts must be **equal**. Find half of 8 counters, a quarter of 12. Name unit fractions up to 1/10.

▶ **Try it on NovaSchool** (open **Simulations** on your dashboard):

- **Halves, thirds and quarters** — Choose how many equal parts, then tap the parts to colour them.
