THE NOVA RESEARCH CURRICULUM

Mathematics

Grade 4 · Term 2

Student edition

Outcomes: MA-4.3 factors, multiples, primes; MA-4.4 fractions; MA-4.5 decimals.

Lesson notes

MA-4.3 Factors, multiples and primes (Weeks 1–4)

Arrays to find factor pairs (24 = 1 × 24, 2 × 12, 3 × 8, 4 × 6). Multiples on a hundred square. Sieve of Eratosthenes to find primes to 100. Divisibility rules for 2, 3, 5, 9 and 10.

MA-4.4 Fractions (Weeks 5–8)

Equivalent fractions to make common denominators; add and subtract unlike fractions (2/3 + 1/6 = 4/6 + 1/6 = 5/6); mixed numbers and improper fractions; fraction of a quantity (3/5 of 40 = 24).

MA-4.5 Decimals (Weeks 9–12)

Decimals as tenths, hundredths, thousandths on a place-value chart and with money (Rs 3.45 is not used in Pakistan, so use metres: 3.45 m). Convert to fractions over 10, 100, 1000; add and subtract by lining up the decimal point.

Workbook pages

Page	Outcome	Activity
1–2	MA-4.3	Factor rainbows; prime sieve to 100.
3–5	MA-4.4	Fraction walls; unlike-fraction sums; mixed numbers.
6–8	MA-4.5	Place-value chart; decimal-fraction match; column sums.

Question bank

#	Outcome	Question	Your answer
1	MA-4.3	How many factors does 24 have?	6 / 7 / 8 / 12
2	MA-4.3	Which number is prime?	21 / 25 / 27 / 23
3	MA-4.3	1 is a prime number. True or false.	True / False
4	MA-4.3	Which is a multiple of 7?	27 / 42 / 45 / 52
5	MA-4.3	Is 135 divisible by 9? Give the reason.	_____
6	MA-4.4	2/3 + 1/6 =	3/9 / 5/6 / 3/6 / 1/2
7	MA-4.4	5/6 − 1/3 =	4/3 / 1/2 / 4/6 / 2/3
8	MA-4.4	2 1/4 as an improper fraction is …	6/4 / 9/4 / 8/4 / 3/4

#	Outcome	Question	Your answer
9	MA-4.4	3/5 of 40 =	15 / 24 / 25 / 8
10	MA-4.4	3/4 + 1/8 = 7/8. True or false.	True / False
11	MA-4.5	0.7 =	7/100 / 7/10 / 70/10 / 7
12	MA-4.5	In 4.372, the 7 is in the … place.	tenths / hundredths / thousandths / ones
13	MA-4.5	3.45 + 1.2 =	3.57 / 4.65 / 4.47 / 15.45
14	MA-4.5	5 − 2.75 =	3.25 / 2.25 / 2.75 / 3.75
15	MA-4.5	0.25 = 25/100. True or false.	True / False
